Extremely hard working, with a marked aptitude for his branch. Sarwan believes in sleeping while others are still having their dinners and is taking morning bath while some are yet preparing to go to bed. SATYA PAL SINGLA

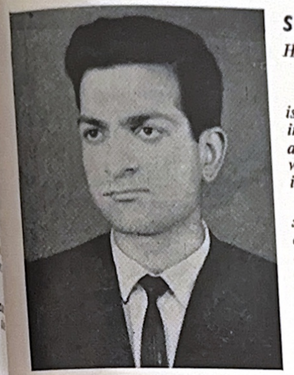
c/o Sh. T. C. Singla, Inspector Income Tax, Hoshiarpur (Pb)

God must have been in very ... mood when he made Singla for he did ... save his material. Regular front bencher ... he works hard at studies though no exam... nations luck so far. A thrifty soul, Singla ... has got a first class legal brain—part ... which he wasted by joining Engg. College ... and part he tries to employ here as best ... he can.



SURAJ BHAN GROVER

H. No. 55 Sector 23-A, Chandigarh

Tall, fair and sober looking (which he is actually not) Grover does not believe in wasting money for specs (which he actually needs). A patent front bencher who rarely bothers about what is going on in the college.

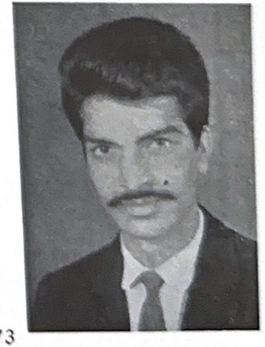
S. K. TANEJA

c/o Sh. G. L. Taneja, 7-V/T-5/Sector 1, Talwara Township (Pb.)

The most conspicuous thing about Taneja a month ago was his spectacles (which were many sizes too small). Pestered into buying a new pair, he looks smarter already. One of the brilliant and conscientious boys, frets over wasted time (Here doth Taneja and the class part).

Fond of boating, he would literally be in the soup if his boat capsized, as he does't know swimming). Stays awake half the night and asleep half the morning. Plays sweep and bridge.....to the dismay of the partners.



SUJAN SINGH DOGRA

The other Dogra is fond of literature—Victor Hugo, Gogol, etc. and is particularly fond of 'Jude, the Obscure' by Hardy. More of Sue than of Jude, we dare say.

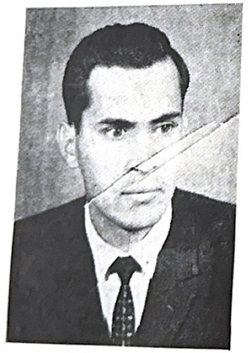
A very keen sportsman though one would not think so by seeing his lazy, ambling gait, he excels in all racket games.

SUNIL NANDA

579, Sector 16-D, Chandigarh

God must have been thinking of economies when he made Nanda for he used the basic minimum with maximum use. To look at Singhla and Nanda is to see the diversity of God's handiwork. He has gained twelve pounds recently—perhaps in desperation. Now we will know the reason why the Indian planes can't (or won't) take off as he is now with 'Air Force.'

Fond of whispered conversation (for its intrinsic value or for the background music value) in class. Fond of chutti and puts his talents to maximum use to obtain it.



VIKRAM SINGH

Rather inconspicuous in his looks, Vikram is the wittiest person of the class and is never at loss for ready and apt answers. A little (more than "a bit") disillusioned with engineering (as we all are), is 'appearing' in I.A.S.

Message

It is a great pleasure that another batch of 'Young Engineers' has successfully completed their course and is going out of this college.

Though India is making rapid progress in all fields, yet compared to the Western countries, we are far behind. This is especially true of the modern courses like Aeronautics and Electronics etc. Our young engineers should take up this challenge. What we need is creative engineers. They should be able to face difficulties and forge ahead. They should have a purpose in life and should build up the nation by hard and honest work. Thus, they will bring credit to themselves and their Alma mater.

I wish them success and happiness in their future careers.

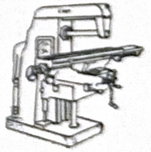
PRODUCTION DIPLOMA SECTION



Message and Greetings

This is the second batch of the Production Engineering Course that is going out into the field. This year has been a year of stresses and strains but the pioneers have always had to face difficulties in leading new courses and the sense of success is also greater.

With the rapid industrialisation of the country, the requirement of good production engineers responsible for operation and maintenance of industrial equipment and for production planning and processes planning is very great. The last year's batch of 51 have practically all been suitably absorbed in small industries of Punjab and Delhi and there is still a large gap to be filled in. I am sure the outgoing students of this batch who have had intensive training in manufacturing processes and techniques have an important role to play in the industrial field and will make their mark in their specialised sphere.

I am proud of the success achieved by the last batch and I am sure my pride will be further boosted by the successes of the present batch.

I wish all the students of this course the best success in life and a most distinguished career.
